LETTER OF RECOMMENDATION

I am pleased to propose **Mr. Vangapally Umesh** for admission to your prestigious college or university's postgraduate program. He is a B. Tech. Computer Science and Engineering student at Vardhaman College of Engineering. I have observed his development and excellence as his professor and the instructor in charge of subjects like "**Foundations of Deep Learning**", "**Big Data Analytics**" and "**Mobile Application Development**" where I delivered instruction on a variety of topics.

Mr. Umesh has a stellar academic record and is an notable, intelligent, and responsible student. He is one of the selected few students who actively pursue projects, excels in theory and practice, and exhibits a passion to learn and apply abilities. He has gained an understanding of the fundamental ideas and subtleties, which makes it easier for him to pick up new subjects and disciplines. He applies an interdisciplinary strategy and connects ideas using his keen analytical abilities.

Mr. Umesh not only excels in academics but also in social activities. He is social, has strong leadership and communication abilities, and works cooperatively with his peers by presenting fresh ideas. I am inspired by his passion and perseverance to accomplish his goal and take the initiative in projects as a visionary and determined individual who uses a methodical approach to developing solutions. He successfully completes a deep learning project in which he uses several deep learning algorithms to identify fruit diseases based on the fruit's key characteristics.

Additionally, he communicated two articles based on the end semester course projects. Umesh exhibits strong research skills and also being participated in research papers. With this new ability, he performs better than the majority of his contemporaries. I wish him luck in his future academic and professional aspirations.

Dr. S. Hariharan

Dr. S. HARIHARAN, B.E., M.E., Ph.D.
Professor, Department of CSE,
Vardhaman College of Engineering,
Kacharam, Shamshabad-501218,
