LETTER OF RECOMMENDATION

I am writing the following letter of reference for **Mr. Vangapally Umesh**, who wishes to enroll in your respected University's Masters of Computer Science program, with the utmost joy and pride. At Vardhaman College of Engineering, he is going to earn a CS bachelor's degree.

Since Umesh was in his fifth semester of graduating, I have worked with him for two years, handling the subject "**Robotic Process Automation Design and Development**". He is highly inventive and logical when solving issues, and because of his methods, I have come to have a favorable opinion of him. He is a treasure of intellect and diligence, I can say without a doubt. Whether he is earning grades or finishing duties given to him in the topics, I have observed his consistency throughout my teaching career.

Umesh has been inventive and ambitious the entire term. His approach to problems and difficult circumstances has always taken me by surprise. He ensures that his classmates feel at ease around him and actively participates in all of our talks.

I can affirm that he is a motivated learner with ingrained technical skills, demonstrating why he merits the chance to attend your university. Please take into account his application and any provided financial support.

Dr. S. Venu Gopal
Head of the Department
Artificial Intelligence and Data Science
